

KELLER GROUND ENGINEERING PTY LIMITED

QUALITY POLICY

Keller Ground Engineering Pty Ltd is committed to provide services and products to its clients that comply with, or exceed, its agreed obligations.

In order to achieve this Keller Ground Engineering Pty Ltd has a quality management system in place in compliance with the requirements of AS/NZS ISO 9001:2008, which cover services rendered and materials supplied by ourselves and our subcontractors and suppliers.

Our quality management system forms an integral part of our operations.

It is the responsibility of the Managing Director to ensure that appropriate quality procedures are in place and implemented. It is the responsibility of all Line Managers and employees in supervisory roles that the quality system is integrated into the working procedures and communicated to all involved.

The effective operation of our quality system ultimately relies on the adherence to the system and the commitment to quality by each and every employee to ensure we provide our clients with the service what we have committed ourselves to execute.

A handwritten signature in black ink, appearing to read "E. Friedlaender", with a horizontal line underneath the name.
